

Pickleball Round Robin

Release Notes — Version 2.3

A cleaner, more reliable way to get your results out of the app, plus medals for the podium.

Medals for 2nd and 3rd

The ranking cards now show a silver medal for 2nd place and a bronze medal for 3rd, alongside the gold trophy for 1st. Everyone below shows their rank number as before. (The medals follow whatever sort you've chosen.)

New: one report, two formats

The old scattered download and copy buttons have been replaced by a single, dependable report with two output buttons:

- **PDF report** — opens a clean, printable page; use your device's "Save as PDF" or "Save to Files" in the print dialog.
- **CSV (spreadsheet)** — saves a file you can open in Google Sheets or Excel.

Each one contains the same three sections in a single file: **Games played & standings**, **Ratings**, and **Head-to-head**. Both are available for this session, this track, all tracks, and for any individual saved session in History.

Why the change

The previous mix of separate downloads and clipboard copies was inconsistent from one device to the next. Consolidating to one report — with a print-based PDF that doesn't rely on bundling a large library — keeps the app file lean and makes saving more predictable across phones. The plain spreadsheet export is preserved in the CSV button.

In History

Each saved session now has its own **PDF** and **CSV** buttons that produce that session's full report. The Rank, H2H, Games edit, and delete buttons are unchanged.

Quality check

Verified in a simulated browser by clicking through it: medals appear for 1st/2nd/3rd and a number for 4th; the PDF opens with all three sections and shows player ratings; the CSV contains the Games, Ratings, and Head-to-head sections; the old download/copy buttons are gone; and the per-session PDF/CSV in History work. Then the full regression across round generation, scoring, rankings, head-to-head, history, ratings, and device transfer. 40 checks in total, all passed.

One device note: the PDF is created through your phone's print dialog, so saving it takes a tap or two there (choose "Save to Files" or "Save as PDF"). This is worth a quick try on your own phone to confirm the flow. Your existing data carries over untouched. Title shows 2.3.
