

Pickleball Round Robin

Release Notes — Version 2.3.2

Fixes the PDF “stuck screen” on phones.

PDF now opens inside the app

Previously, tapping PDF opened the report in a separate page. On a phone — especially when the app is launched from the Home Screen — that page had no back button, so there was no way to return to the app without closing and reopening it.

Now the report opens as a panel inside the app with two buttons at the top: ◀ **Back to app** returns you to where you were, and **Save as PDF / Print** opens your device’s print dialog (where you choose “Save to Files” or “Save as PDF”). When you print, only the report is sent — not the app around it.

This applies on the Rankings screen and on each saved session’s PDF button in History.

Quality check

Verified in a simulated browser: the report opens as an in-app panel without spawning a new window, “Back to app” removes it and returns you to the app, the Print button triggers the device print dialog, and the History PDF uses the same panel. Opening it twice doesn’t stack copies. The report contents and columns are unchanged from 2.3.1, and the full regression passed.

Worth a quick try on your phone to confirm the Back/Print flow feels right. Your data carries over untouched. Title shows 2.3.2.
