

Pickleball Round Robin

Release Notes — Version 1.9

Edit a saved session

Realize a score was entered wrong after you already saved a session? On the **History** tab, each saved session now has an **Edit** button. It reopens that session's games so you can fix any score, then **Save changes** updates the saved session and its standings. Your current live session is not affected.

Note: Edit is available for sessions saved with this version (1.9) onward. Sessions saved by older versions don't have the underlying game detail stored, so they can't be reopened for editing — only viewed.

Player ratings

You can now give each player an optional rating (pickleball-style, e.g. 3.5). In **Edit saved players**, tap **edit** on a player to set their name and rating. Ratings show as a small badge on the player chips and lists.

To see players grouped by level, use **Sort by rating** in Edit saved players, or **By rating** in the "Players this session" list on Setup. This sorts and labels by level so you can eyeball who's where — it doesn't change how rounds are generated.

Quality check

Tested editing a saved session end-to-end in a simulated browser — correcting a score updates the saved standings while leaving the live session untouched — plus rating entry, display, sorting by rating, and ratings surviving a device transfer. Ran the full regression. 35 checks, all passed.

Still parked: the session/track file-sharing question (contents are correct; we'll look at the delivery when you're ready). Empty-track deletion and the missed-games penalty remain on the list. Title shows v1.9.
